# Shreeyans Dodda

423-424-9072 | shreeyans21@gmail.com | https://www.linkedin.com/in/shreeyansd | github.com/ShreeyansD

## Education

**Purdue University** — West Lafayette, IN
*Bachelor's in Computer Science* — *Aug. 2026 – Present*

**East Hamilton High School** — Chattanooga, TN
*High School - 10/297, 4.0/4.0 Unweighted, 4.644 Weighted* — *Aug. 2022 – May 2026*

## Experience

**Mathnasium Instructor** — August 2025 – October 2025
*Mathnasium* — *Chattanooga, TN*

- Tutored children ranging from Kindergarten to 12th grade in various math topics
- Adapted teaching style to the needs of individual students
- Tracked progress by documenting concepts mastered and areas needing improvement

## Projects

**Image Generator** | *Python, HTML/CSS, OpenAI, Flask* — January 2026

- Developed a Flask-based web application capable of generating high-resolution AI images using OpenAI's DALL-E 3 model from user-provided prompts
- Implemented a backend pipeline that requests images from the OpenAI API, downloads them, and stores them for instant display
- Built a HTML interface allowing users to input prompts, select the amount of images, and view generated results

**Recycling Application** | *Python, OpenAI, OpenCV* — Febuary 2026

- Built a real-time waste-classification system using OpenCV and OpenAI GPT-4o, allowing for the live webcam analysis of objects for compost, recycling, or trash sorting
- Implemented a pipeline that captures frames, encodes them to base64, and sends them to GPT-4o for classification using a strict, rule-based prompt
- Designed an interactive UI overlay with bounding boxes, color-coded results, and live status updates

**Rag Chatbot** | *Python, LangChain, OpenAI, Pinecone Database* — May 2026

- Built a RAG System using LangChain to chunk and process PDF documents into embeddings
- Implemented OpenAI imbeddings and vectorized document chunks into the Pinecone Database, allowing for quick semantic searches
- Integrated GPT-4o to generate precise answers and cite document sources reliably

**Reminder App** | *Python, Twilio API, React Native, Expo, TypeScript* — July 2026

- Developed a cross-platform mobile app using React Native (TypeScript) and Expo to send voice call-reminders directly from a phone
- Built a Python backend using the Twilio API to initiate text-to-speech calls
- Designed a mobile interface in App.tsx, allowing users to schedule 1-3 reminder calls with a custom message before their event

## Technical Skills

**Languages**: Java, Python, TypeScript, JavaScript, HTML/CSS
**Frameworks**: React Native, Expo, Langchain, Node.js, Flask
**Developer Tools**:Expo Go, Twilio API,, Google Cloud Platform, VS Code, PyCharm
**Libraries**: pandas, NumPy, Pinecone SDK, OpenAI

## Certifications

**UPenn Python Certification** — April 2025
*Coursera* — *Online*

- Achieved Python Certification from UPenn
